Younger-looking,  
healthy skin that glows.

# The beauty of Libra

## Safety, Comfort, Results.

As a perfect complement to other skin treatment procedures, or as a stand-alone option, Libra™ microdermabrasion is a beautiful solution for smooth, healthy-feeling skin and a more youthful appearance.

*Treatment with Libra is not painful.*

### How does Libra work?

Libra microdermabrasion applies a highly controlled stream of fine crystals plus suction to the surface layer of skin. This gentle abrasion and suctioning works to remove dead skin cells, unblock clogged pores, smooth the appearance of facial lines, stretch marks and minor scars, plus reduce the appearance of blemishes and uneven skin tones.

Suction massages deeper layers of skin – stimulating healthy circulation and allowing oxygen-rich blood to flow more freely near the skin's surface to feed and repair unhealthy cells. The Libra treatment is non-invasive, painless and takes less than 30 minutes to complete.

### Safe and Comfortable.

Most people only feel minimal tingling during the procedure, and the skin may appear slightly pink for 24 – 48 hours after treatment.

Libra is suitable for most all skin types, for people of all ages.

### Expect the Best.

You can expect Libra microdermabrasion to leave your skin feeling smoother, softer, and fresher with a healthy, youthful glow.
